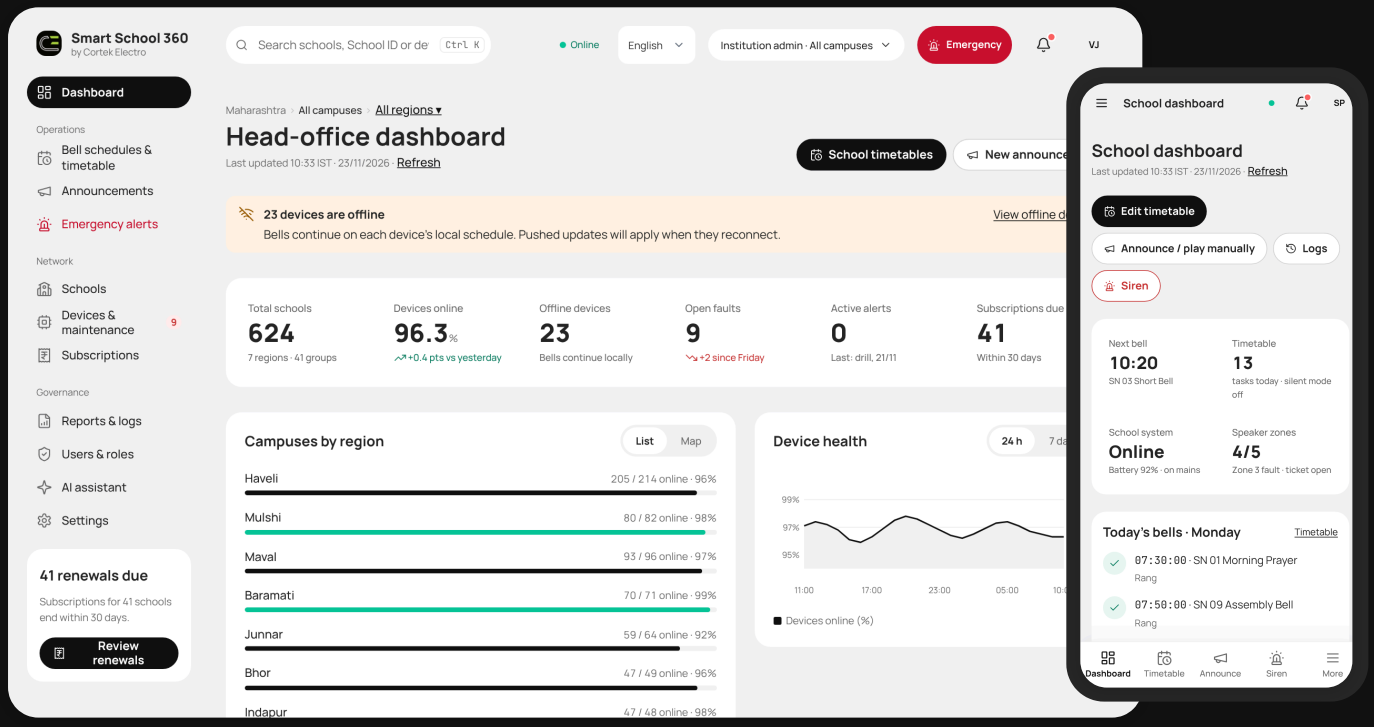
THE SMART SCHOOL 360 APP

One app for every bell across all your campuses

Timetables, announcements, emergency alerts and device logs for schools, colleges and multi-campus institutions — from head office to the teacher's phone.



Per-day timetables · AI timetable from a photo · Announcements · Emergency siren · Device logs · मराठी · हिन्दी · English

1 app
for one campus or hundreds

3
languages: मराठी, हिन्दी, English

Offline
bells keep ringing without internet

Subscription software for the Smart School 360 controller · 500+ schools installed

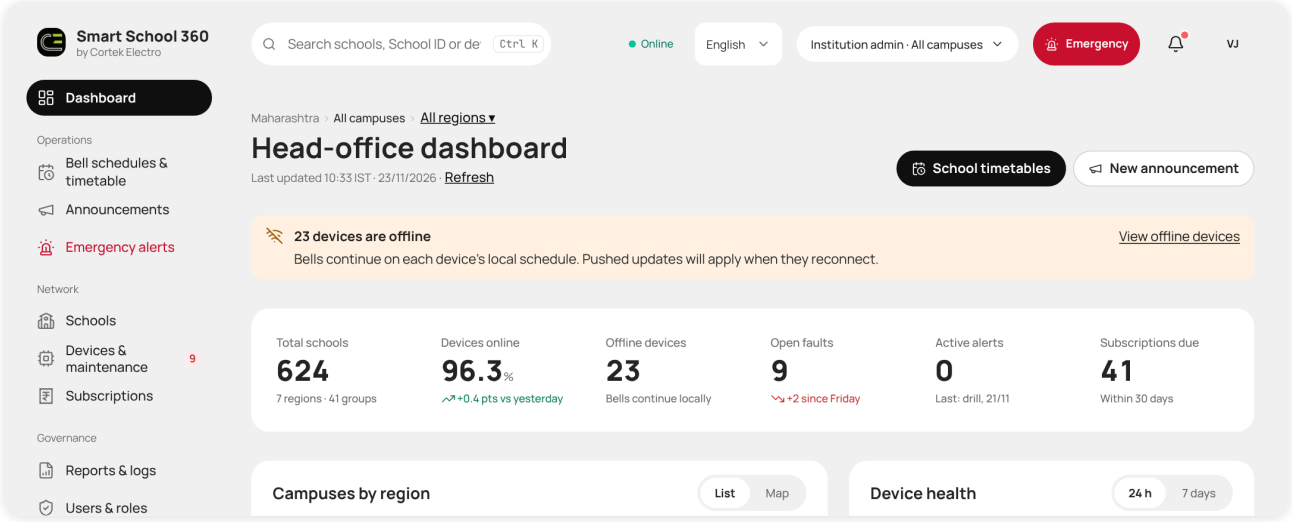
ONE APP, FIVE ROLES

Everyone sees exactly what they need

ROLE	SEES	CAN DO
Cortek support	Your whole account	Audio library, firmware, device settings and maintenance tickets
Institution admin	All campuses	Any campus timetable, announcements and alerts, reports, users
Region / group head	Campuses in their group	Announcements and siren, active systems, logs and reports
Principal	One campus	Timetable and holidays, announcements, Play manually, siren, device logs
Teacher	One campus	The emergency siren — nothing else to learn

Head-office command dashboard

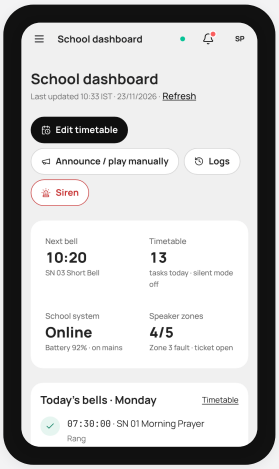
Every campus live: online, offline and faults by region, with drill-down to each campus.



Principal: the campus at a glance

Built for the phone they already have.

- ✓ Next bell and today's timetable
- ✓ Device online, battery and speaker zones
- ✓ One tap to edit the timetable, announce or sound the siren
- ✓ The campus device log for every bell and alert

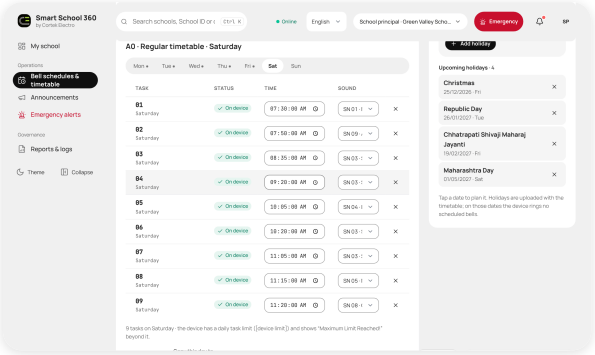


THE SOFTWARE

Built around how a school day really runs

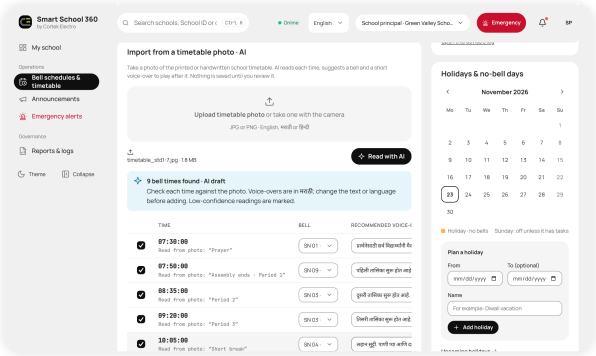
Different bells for each day

Each task is a time, a sound number and a day. Add, edit, copy Monday to Mon–Fri, keep A0 regular, A1 exam and A2 special timetables per school.



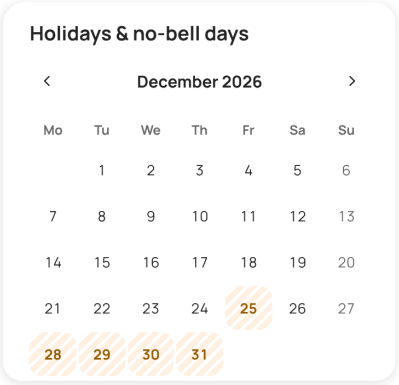
AI builds the timetable from a photo

Photograph the printed timetable; AI reads every time and suggests a bell and a मराठी voice-over. Nothing is saved until the principal approves.



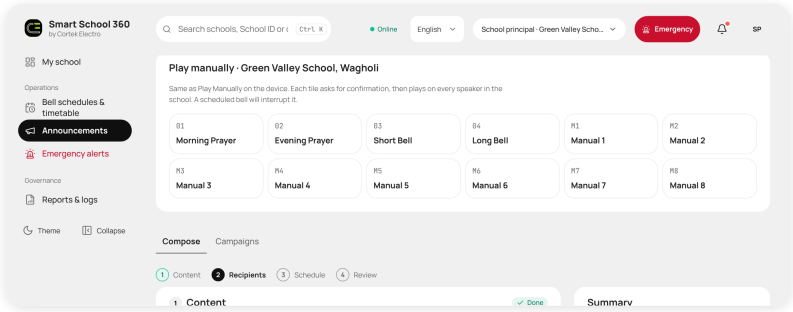
Holidays planned ahead

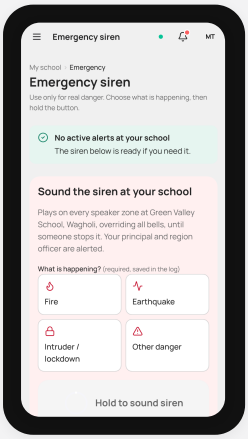
Single days or ranges; the device stays silent on those dates.



Announcements to the whole school

मराठी, हिन्दी or English: type for text-to-speech, record, or upload MP3. Play prayers and bells manually with one tap.





Emergency siren: fast, but never by accident

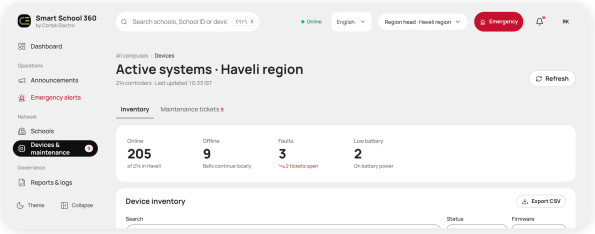
- ✓ Choose the reason and scope: one campus up to the whole institution
- ✓ Hold the button, then 5 seconds to cancel — no accidental alarms
- ✓ Plays on every speaker zone until someone stops it
- ✓ Lower levels acknowledge; the sender or a higher level closes it
- ✓ Every bell, announcement and siren is in the device log

VISIBILITY

Know every campus system is working

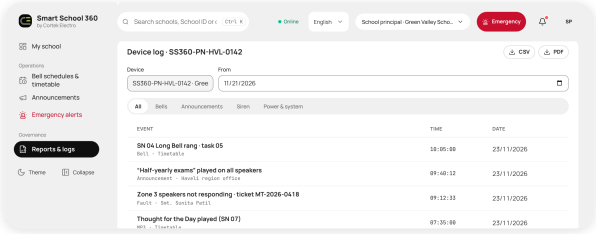
Active systems

Online, offline and faults for a group or every campus, with maintenance tickets tracked to closure.



A log for every device

Every bell, announcement, siren, power cut, clock sync and timetable upload — exportable as CSV or PDF.



Offline-first

Timetables live on the device; updates wait for the network.

Three languages

मराठी, हिन्दी and English throughout.

Multi-campus scale

Hundreds of campuses, one view for head office.

Secure, role-based

Checked sign-in; each person sees only their scope.

Audit-ready

Who did what, when — for every change.

Any phone or desktop

Easy for everyone; a teacher sees one button.

SUBSCRIPTION

One simple annual plan per campus

Pricing on request, based on the number of campuses.

- ✓ Users for every role
- ✓ Announcements and siren alerts
- ✓ AI timetable import and voice-overs
- ✓ Cortek support and remote fixes
- ✓ Cloud timetables and holidays
- ✓ Device logs and reports
- ✓ New features as they ship
- ✓ Secure cloud backup

See it working across your campuses

1. **Live demo** — Every role, with your officers
2. **Pilot a few campuses** — Train principals, upload timetables
3. **Review together** — Uptime, alerts and logs after a month
